

# Ball Transfers

## **About Yellow Jacket Ball Transfers**

Yellow Jacket would like to introduce you to one of the best ball transfers on the market today. Although the Yellow Jacket may look like just another Ball Transfer, that is where the resemblance ends.

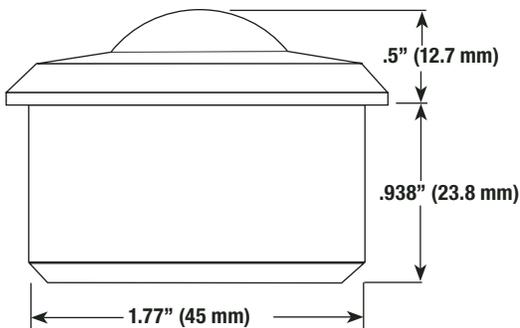

The cases are CNC machined from aircraft grade aluminum and hard coat anodized for superior corrosion protection. The cups are coined to a very close tolerance out of high carbon stainless steel, polished to a high luster then carefully heat treated and tempered to produce one tough cup. Each Ball Transfer is carefully hand assembled and inspected to insure a top quality product to our customers.

Yellow Jacket has started an industry leading rebuilding program, where you send the used Yellow Jacket Ball Transfers back to us after being in service to be refurbished for a substantial savings.

The Yellow Jacket sets new standards for all others to live up to.

## **Yellow Jacket Features**

- Heavy duty 500 lb load capacity
- Instantaneous and omnidirectional movement heavy loads
- All internal components made of high quality stainless steel
- Self Cleaning bearing cup allows moisture and debris to fall through the bottom of the cup
- No lubrication required
- Long service life
- Can be rebuilt for substantial savings
- Affordable price
- Existing customers who have Yellow Jacket Ball Transfers in use now may take advantage of the new rebuild program.
